

## Instructions for the care of the Stanbury uniforms.

**Store the uniforms per these instructions.** Use the wishbone hangers provided for your use. The use of the hangers will maintain the styling of the uniforms, preventing creased shoulders. Do not crowd the uniforms to avoid wrinkling and to allow for air circulation. Proper ventilation is necessary to prevent mildew. **DO NOT** store the uniforms in garment bags.

In warm weather especially, uniforms should be aired and dried on their wishbone hangers after each wearing - **DO NOT** store in garment bags at home. Garment bags are only to transport the uniform from one place to another.

1. Do not place the garment in an airtight container or bag.
2. Allow the garment to air dry – They need to breathe.
3. Air-dry the garment completely prior to placing in a closet. If laundering is required see below.

**Under no circumstances are you to launder the uniforms yourself.** Instructions on an acceptable company to wash the uniforms per the Manufacturer's instructions will be provided to you. If you do not live in the Manchester, NH vicinity, you are asked to turn the uniform in when it needs to be laundered and the Corps will have it done and return it to you.

Alterations will only be made with the specific approval of the Corps Director and at no time should any material be cut out of the uniform if alterations are approved.

---

### Uniform sign out agreement

I have read the above instructions and agree to follow them to the letter. I understand that if the uniform should mildew that I will be responsible for replacing the uniform and that the value is Three Hundred and Fifty Dollars (\$350). The material has been thoroughly tested and will not mildew if stored outside any type of protective cover.

I will always have the uniform laundered by a company approved by the Muchachos and that if I cannot bring the uniform to an approved laundry, I will return the uniform to the Muchachos for laundering.
